

getCommandType

processMessages

getCommandModuleAndCommand

```
graph LR; A[getCommandType] --> C[getCommandModuleAndCommand]; B[processMessages] --> C;
```

The diagram illustrates a flow or dependency. On the left, there are two separate boxes: 'getCommandType' (top) and 'processMessages' (bottom). Both of these boxes have a blue arrow pointing towards a single, larger box on the right labeled 'getCommandModuleAndCommand'. This suggests that both 'getCommandType' and 'processMessages' are inputs or prerequisites for the 'getCommandModuleAndCommand' function.
