

averagesClear

handleControlBoxReturnData

updateAverages

```
graph LR; A[averagesClear] --> C[updateAverages]; B[handleControlBoxReturnData] --> C;
```

The diagram illustrates a flow where two separate functions, 'averagesClear' and 'handleControlBoxReturnData', both trigger or call the 'updateAverages' function. The 'averagesClear' box is positioned above the 'handleControlBoxReturnData' box, and both have blue arrows pointing towards the 'updateAverages' box on the right.
